**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	Application No. 10/528,352	Applicant(s) SCHOMIG ET AL.	
	Examiner Suba Ganesan	Art Unit 3774	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 17 March 2005.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, drawn to a stent system.

Group II, claim(s) 7-20, drawn to method for fabricating a stent.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The corresponding technical feature is not special. Sirhan (Pub. No.: US 2002/0082679) discloses rough surfaces.

3. During a telephone conversation with Franco Serafini on 9/11/2007 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-6. Affirmation of this election must be made by applicant in replying to this Office action. Claims 7-20 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3774

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Sirhan et al. (Pub. No.: US 2002/0082679).

3. Sirhan discloses a stent system comprising a stent with a roughened exterior surface for coating with a drug (para 177). The drug can be tacrolimus (para 30) and the stent is a stainless steel material (para 177). The stent is delivered using a balloon catheter (para 143).

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sirhan et al. (U.S. P.G. Pub. No.: 2002/0082679) in view of Thompson (U.S. Pat. No. 6,254,631).

6. Sirhan is explained supra. However, Sirhan does not appear to disclose roughening the inner or side surfaces in addition to the exterior stent surface.

Thompson teaches the use of roughened inner and side stent surfaces (see abstract and fig. 4) for the purpose of preventing relative motion between the stent and the delivery balloon (col. 3 lines 10-46). Therefore it would have been obvious to one of

Art Unit: 3774

ordinary skill in the art to modify the stent of Sirhan to include roughened inner and side surfaces as taught by Thompson for the purpose of allowing the stent to better grip the delivery balloon.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Williams (U.S. Pat. No. 5,423,885) discloses a rough surface stent formed by teeth that extend from the outer wall of the stent. Wright et al. (U.S. Pat. No. 6,273,913) discloses a drug eluting stent with a notch in the outer surface which can be considered a roughened surface for drug coating.
